

Western Pennsylvania Coalition for Abandoned Mine Reclamation

Our Services

Our Goals

Promote and advocate for the AMR Programs and policies that lead to significant water quality improvements and reclaimed lands.

Address critical aspects of OM&R for AMD passive treatment systems to sustain environmental improvements.

Promote awareness of the environmental and economic benefits of AMR.

Optimize the financial and organizational resources necessary to fulfill our mission.

Enhance or expand WPCAMR's role to achieve and maintain environmental improvements in the region.

Quick Response

The Quick Response program provides funds, upon request and proper approval, to any physical facility and/or water quality BMP that is otherwise eligible to apply for Growing Greener grants, especially AMD treatment systems. A highlight of this program is the speed at which WPCAMR serves as a pass through and can address emergency situations that arise as well as correcting emergent issues before they cause treatment system failure and impact water quality that is improved through treatment.

Advocacy

WPCAMR will continue to co-chair the PA AML Campaign and advocate for AMR-positive legislation, both State and Federal. We will continue to work with decision-makers to ensure that they understand and support Abandoned Mine Reclamation.

Fiscal Sponsor

WPCAMR continues to act as fiscal sponsor for Conservation Districts and non-profits to further their water quality and AMR goals.

Annual PA AMR Conference

The PA AMR Conference is the longest-running annual environmental conference in Pennsylvania focused on abandoned mine reclamation and the associated issues our communities face. The PA AMR Conference provides a forum for the dissemination of information and encourages discussion between industry, watershed groups, and decision-makers that can help to further innovations in public policy, abandoned mine reclamation, and restoration of PA's watersheds and communities.
